The shooting victim did NOT HAVE A KNIFE.
The victim has **READING GLASSES** in one hand and a pen in the other.
There's no reason to use a low-resolution grainy photo when the original video is high-resolution.
Also, why pick up a skateboard if you're planning to shank someone?

I've gone through both shooting videos frame-by-frame, multiple times.
I just found out that **@EmanuelCoin** did the same thing and (he) used VLC to dump each frame, because he's smarter than me). But he came to the same conclusion. No knife.
